

Tips for Emptying Portable Toilets

Waste from portable toilets contains bacterias and chemicals that can have harmful effects on health and the environment.

- Only dispose of lavatory waste at **designated disposal stations**.
- **Never use a freshwater hose** to rinse drains or portable toilets.
- **Use gloves or hand sanitisers** to prevent bacterial infections.
- Portable toilets are solely for **pee, poo and paper**. Only use toilet paper that is suitable for portable toilets.
- **Use ecological and biodegradable cleaning products**. Avoid using chlorine or cleaning products that have formaldehyde or phosphate.
- If possible, **empty kitchen and shower water** in other designated dump stations than for lavatory waste.
