**Subject: permit to fly a drone**

The Environment Agency of Iceland has received an application from OCTOCAMVISION SL, dated 06 July 2023, for a permit to fly a drone within Geysir area and Gullfoss area.

Geysir is protected as natural monument, cf. regulation no. 660/2020. All disturbance of geological monuments is prohibited, incl. any inscriptions and disturbance of the activity and water level of the hot spring area, disturbance of hot springs, hot springs, soils and rocks, without permission. Helicopters and other manned aircraft may not land within the area without the permission of the Environment Agency. Operating an unmanned aircraft/drone within the protected area is subjected to a permit from the Environment Agency of Iceland.

Gullfoss is protected as a nature reserve, cf. regulation no. 141/1979. Disturbance to geological formations, vegetation and wild animal life is prohibited. Operating an unmanned aircraft/drone within the protected area is subjected to a permit from the Environment Agency of Iceland.

***Description of the project:***

The applicant requests to fly a drone, for commercial use, at the protected areas Geysir and Gullfoss July 24, 25 and 26. Two professional pilots will be in charge of the flight and the drones that will be used are two, DJI MAVIC 3, C1. MTOM 0.9Kg ( 09Y3K7F0H4U022) and - DJI Inspire 2. MTOM 4.25Kg (1581F45TB21A42AD01T5).

***Impact assessment:***

The Environment Agency of Iceland considers the project not likely to have negative impact on nature and conservation value of the two sites if conditions of the permit are followed. The droneflight might have negative effect on other visitors experience at both of these sites but if conditions of the permit are followed the agency considers that the impact can be reduced.

***Conclusions and conditions:***

The Environment Agency of Iceland hereby grants OCTOCAMVISION permission on its behalf to fly a drone within the Geysir area and Gullfoss area as described above on July 24-26 on the following conditions:

- Keep this letter with you on site during the project. The permit conditions should be introduced to the staff of the project before work begins.
- The applicant shall inform rangers in the area about their arrival and departure. This is to be done 24 hours before entering the area and again before leaving it.
- If the project dates or description changes the Environment Agency shall be notified as soon as possible.
- Crew members should always stay on authorized paths/tracks/roads.
- If any complications occur during the project, please contact the ranger or the Environment Agency of Iceland, tel. +354 591 2000.
- The crew should be conscious of other guests on the sites and make sure that filming causes as little disturbance as possible to other visitors. If the material is meant for public viewing it must be noted in the video/subtext that permission from the Environment Agency was obtained for the filming/photography.
- The crew must follow rules of conduct that apply to the area.
- The project's staff is required to prevent all disturbance to the environment and make sure that all litter is removed from the sites.
- An unmanned aircraft should never be flown in close proximity to people. Please take precaution not to disturb people's experience, their safety or personal privacy nor the general peace of the protected areas being filmed.
- Flight time should be kept to a minimum and flight should be avoided during the area's busiest times of the day.
- If the use of unmanned aircraft causes disturbance to wildlife in the area, its use should be ceased at once.
- The conductor of the unmanned aircraft is responsible for the aircraft within the protected area. This includes taking responsibility of any possible risk of harm to people, fauna and nature and leaving no permanent marks on the site in question. Should the aircraft crash, all components from it must be collected and removed from the area.
- For safety reasons, the pilot of an unmanned aerial vehicle must wear marked clothing so that the person can be identified.
- **For safety reasons, it is prohibited to fly a drone below 50m above Strokkur and Geysir.**

If the applicant causes damage to nature, according to art. 87 in the Nature Conservation Act no. 60/2013, the Environment Agency of Iceland can, according to the Nature Conservation Act, f.e. order the licensee to fix damage to nature and vegetation and/or stop the project.

The Environment Agency of Iceland can according to art. 89 in the Nature Conservation Act no. 60/2013 change conditions of the permit, add new conditions or withdraw the permit in order to prevent damage to nature if environmental conditions change.

According to art 89. in the Nature Conservation Act no. 60/2013 the Environment Agency can withdraw the permit if conditions of the permit are not complied to.

The usage of a drone shall be according to regulation no. 990/2017 on the operation of remotely piloted aircraft (<https://www.icetra.is/aviation/drones/>).

**Unmanned aircraft should take off and land in a safe distance from other visitors according to regulation 990/2017 on unmanned aircrafts.**

**Please note that according to the regulation all drones used for commercial flight need to be registered at the Icelandic Transport Authority.**

***Permission fee:***

Environment Agency of Iceland charges a fee for processing applications for permits in protected areas based on Article 92 of Act no. 61/2013 on Nature Conservation. The fee for cinematography and droneflight is 76.000 ISK according to art. 24. b. in the agency's tariff no. 535/2015.

***Supervision:***

The Environment Agency will supervise the project. The supervisor will be a ranger from the Environment Agency.

Sincerely
